

Microfreight[®]

THE INDUSTRIAL FREIGHT LIFT

Strong and reliable solution for moving goods only or goods with an attendant.

DALDOSS
PASSENGER & GOODS LIFTS

“Discover the Daldoss world”

Let us think for a moment of the space around us, in all of its three dimensions. Now let us imagine a man moving freely within this space. In two dimensions he will be completely self-sufficient in his movements as his legs will take him wherever he likes. But if he wants to tackle the third dimension, he'll need to hang onto a rope, dangle from a balloon or... use a lift.

DALDOSS conquers the third dimensions.

Microfreight is the ideal solution for industrial and commercial applications

Microfreight[®] The industrial freight lift

Microfreight range is composed by two product lines, **Microfreight Classic** for goods only and **Microfreight Plus**, with car operation panel, for goods with an attendant. Rated load from 500 to 1500 kg (1400 kg for Microfreight Plus), always supplied with structure supported frame which enables it to be installed virtually everywhere. Especially suitable for transporting goods between floors.

Microfreight range is available in different models offering a wide choice of car sizes. All the models operate inside a rapidly erected structure supported frame baked enamel RAL 7038. Landing doors, single or double hinged, are finished in baked

enamel RAL colours (RAL 7038 as standard), or in stainless steel AISI 304. The landing push button station is fitted with "lift arrival", "lift occupied" and "lift position" indicators. Constant pressure push button control in the car and automatic operation at landing for **Microfreight Plus** model.

Microfreight range can travel up to a maximum 15 meters and up to two entrances can be fitted on each floor. Thanks to the reliable electronic 3-phase control, efficient motor with high quality reduction gearbox and electromagnetic disk brake with flywheel for emergency operation, the functioning is extremely quiet and safe in any type of installation

The experience and know-how acquired from over 60 years in the lift industry operating in the most important market worldwide, has led to Daldoss developing a highly modern range of elevators which features cutting edge space-saving technology with a pleasing aesthetical design. **Microfreight** is designed to offer the simplest, quickest, most economical and reliable solution to heavy lifting problems, also for goods with an attendant, in warehouses, industries, supermarkets, shops and any other environment in which it is necessary to move pallets, loads, trolley, containers, etc.

MICROFREIGHT CLASSIC

The industrial freight lift for goods only

MICROFREIGHT PLUS

The industrial freight lift for goods with an attendant

Microfreight *Classic* installation in a car dealer (Italy),
model 1500 kg, car finishes RAL 7038.

Microfreight Classic installation in a warehouse (The Netherlands), model 1000 kg, double hinged door with window, standard finishes RAL 7038.

Microfreight Classic installation in a warehouse (UK), model 1000 kg, standard finishes RAL 7038, with ramp. Ideal solution also for transporting goods with trolleys.

Typical applications

Microfreight[®] Classic

All **Microfreight** models operate inside a rapidly erected structure supported frame, which makes installation simple with minimal builder's work. **Microfreight** are usually available with short lead time and, subject to builder's work, can be installed and working within a few days.

Installation in a warehouse (The Netherlands), model 1500 kg with standard RAL 7038 finishes.

Installation in a shopping centre (France), model 1000 kg, double hinged door; waterproof push button.

Installation in a show room (Italy), model 500 kg, double hinged door; standard finishes.

Installation in a car factory (UK), model 1000 kg, standard finishes and bump rail.

Norms and regulations

- Machinery Directive 2006/42/CE
- Electromagnetic Compatibility 2004/108/CE
- Directive EN 81.31

Microfreight Classic technical data

Standard	
Drive unit	3-phase electric motor with auxiliary brake for avoiding uncontrolled movements of the car and flywheel for emergency operation.
Power	3 kW.
Operation	Fully automatic.
Rated load	500-750-1000-1500 kg.
Speed	0,19 m/s (500-750-1000 kg) - 0,13 m/s (1500 kg).
Stops	Up to 5 in standard configurations.
Travel	Up to 15 meters (for higher travel feasibility to be checked).
Car	Constructed from mild steel sheeting baked enamel RAL 7038 (standard), or with Daldoss RAL colour range, or in stainless steel AISI 304 (optional). Vinyl covered floor. Ceiling lighting fixture.
Entrances	Up to 2 entrances for each floor, in line or opposite.
Landing doors	Manual single or double hinged. Mechanical door lock with electrical striker. Finished in baked enamel RAL 7038 (standard), or with Daldoss RAL colours range, or in stainless steel AISI 304 (optional).
Landing push button station	"Lift arrival" and "lift occupied" indicators are fitted at each entrance. Emergency STOP push button. Push buttons IP65.
Various	Machine room cabinet.

Optional	
Drive unit	Flight timer, phase relay, VVVF speed regulator.
Car	Manual collapsible car gate, drop bar to secure load, bump rails, car made in stainless steel AISI 304.
Landing doors	With wired glass window. Fire rated EI 60 - EI 120.
Landing push button station	Key switch to activate push button, intercom system.
Various	Custom-built lifts, machine room cabinet installed at any floor, structure supported frame cladding finished in steel sheet, modular type.

Typical applications

Microfreight® Plus

The modularity of components parts facilitates the installations of **Microfreight** in any type of building. An opening through each floor, an electrical power supply and shaft enclosure in harmony with the interior design is all that is required to have **Microfreight** quickly installed both in existing and new buildings.

Installation in an appliance factory (The Netherlands), model 1500 kg, double hinged door, waterproof push button, standard RAL 7038 finishes.

Installation in a car dealer (Italy), model 1000 kg, two entrances with double hinged door.

Installation in a sports centre (The Netherlands), model 1000 kg, special red coloured finish (different colours available).

Installation in a warehouse (Italy), model 500 kg, single hinged door, standard RAL 7038 finishes.

Spaces and costs saving

Microfreight, thanks to its structure supported frame and the reduced dimensions of pit and headroom, has been designed to reduced to a minimum the space occupied by the shaft, saving valuable floor space in the building. No load-bearing lift shaft is required. The low motor power of **Microfreight** allows reduced energy consumption and the strength of components guarantee a safer, reliable and solid product. Thanks to the quality of the products, due to first class materials, brake downs are reduced to the minimum.

Microfreight Plus technical data

Standard	
Drive Unit	3-phase electric motor with auxiliary brake for avoiding uncontrolled movements of the car and flywheel for emergency operation.
Power	3 kW.
Operation	Automatic at floors. Constant pressure push button control in the car.
Rated load	500-750-1000-1400 kg.
Speed	0,13 m/s.
Stops	Up to 5 in standard configurations.
Travel	Up to 15 meters (for higher travel feasibility to be checked).
Car	Constructed from mild steel sheeting baked enamel RAL 7038 (standard), or with Daldoss RAL colour range, or in stainless steel AISI 304 (optional). Vinyl covered floor. Ceiling lighting fixture. Overload device with ring bell. Bump rails. Access protected by full height curtain photocell cat. 2.
Car operation panel	With constant pressure push button. Key switch (ON/OFF positions) to enable car push button and to disable landing push buttons. Emergency STOP push button.
Entrances	Up to 2 entrances for each floor, in line or opposite.
Landing doors	Manual single or double hinged. Mechanical door lock with electrical striker. Finished in baked enamel RAL 7038 (standard), or with Daldoss RAL colours range or in stainless steel AISI 304 (optional). Internal closure handle. Bottom floor landing doors with manual reset contact.
Landing push button station	"Lift arrival" and "lift occupied" indicators are fitted at each entrance. Emergency STOP push button. Push buttons IP65. Intercom system.
Various	Machine room cabinet.

Optional	
Drive unit	Flight timer, phase relay.
Car	Made in stainless steel AISI 304.
Landing doors	With wired glass window. Fire rated EI 60 - EI 120.
Landing push button station	Key switch to activate push button.
Various	Custom-built lifts, machine room cabinet installed at any floor, structure supported frame cladding finished in sheet steel, modular type.

Standard and optional finishes

Customization of the lift

Microfreight has been designed and built with extreme attention to quality and strength of materials, for ensuring maximum durability and minimizing maintenance and running costs.

Standard finishes

Motor drive unit located at bottom floor and fitted on the side of the lift	Machine room cabinet	Single hinged landing door baked enamel RAL 7038 (*)	Double hinged landing door baked enamel RAL 7038 (*)
			
<p>(*) Daldoss RAL colours range or door in satin stainless steel AISI 304 available on request.</p>			

Landing door internal closure handle (Microfreight Plus only)	Bump rail (optional for Microfreight Classic)	Landing push button station (push buttons IP65)	Car operation panel (Microfreight Plus only)
			

Customized features

Microfreight range has a wide range of finishes and optional and can be customized by installing accessories to further increase safety and functioning of the lift, e.g.: flight timer, VVVF speed regulator, etc.

Optional finishes

Drop bar to secure load (Microfreight Classic only)	Manual collapsible car gate (Microfreight Classic only)	Intercom system	Landing door window with wired glass.
			

Standard colours and materials

Always equipped with structure supported frame for indoor installations

Microfreight®

Technical data	
Drive system	Traction type.
Rated load	Microfreight Classic: 500-750-1000-1500 kg. Microfreight Plus: 500-750-1000-1400 kg.
Installation	Always with structure supported frame.
Operation	Microfreight Classic fully automatic. Microfreight Plus automatic - constant pressure push button in the car.
Stop	Up to 5.
Travel	Up to 15 meters.
Speed	Microfreight Classic: 0,19 m/s (500-750-1000 kg) - 0,13 m/s (1500 kg). Microfreight Plus: 0,13 m/s.
Power supply	3-phase.
Motor power	3 kW.

Operation

The electric operation guarantees optimum performance and extremely low noise production. Microprocessor controlled operation is a further guarantee of performance. A pit of 150 mm, reduced headroom and standard structure supported frame reduce builder's work for installation to the minimum.

Quality

Intelligent and modern management, maximum product standardization, highly automated production and the adoption of avant-garde technology enable Daldoss to guarantee constant compliance to the standards provided for by UNI EN ISO 9001:2008 Company Certification.

Safety features

Microfreight fully complies to the Machinery Directive 2006/42/EC and obtained the Type Examination Certificate released by the Notified Body Liftinstituut. Daldoss is able to supply various safety equipment to comply with different national and international standards and regulations.

The other Daldoss products

A complete range of lifts for the vertical transport of goods and people

Daldoss can solve any problem in the vertical transport, thanks to its wide range of products, which are able to give the right solution both in residential and commercial applications. Daldoss now operates worldwide thanks to its distributors and partners, which guarantee an excellent after sale and maintenance service

with the highest quality levels. In addition to our employees, Daldoss makes use of many high level technical collaborations both with experts from research institutes and universities. Since the Company was launched, more than 150,000 units have been built and sold around the world.

Microlift®

The most versatile range of small electric service lifts, for goods only; with capacity ranging from 24 to 300 kg. Always with structure supported frame. It can be installed anywhere thanks to the modularity of the project. A wide range of options available. The best solution to move goods between floors in hotels, pubs, restaurants, clubs, offices, companies, warehouses and shops.

Level® - Level® Map - Level® Plus

A complete range of platform lifts with capacity of 250, 300 and 500 kg. Available also with automatic control both in the car and at floors. Available with 100 mm pit, 2500 mm headroom and with optional structure supported frame both for indoor or outdoor applications.

The ideal solution for one family houses and residences, especially in presence of elderly and persons with impaired mobility.

Easylife®

The compact hydraulic passenger lift mainly for residential buildings with capacity ranging from 180 kg to 550 kg and speed up to 0.5 m/sec. Available also with 200 mm pit, 2600 mm headroom and with structure supported frame both for internal and external applications. Lift can be equipped with automatic or semiautomatic doors, an ideal solution for existing buildings.

The lift for the impossible spaces.

Guarantee

Spare parts and maintenance

Daldoss and its partners can provide a maintenance service covering the whole operational life of each lift.

One of the principal objectives of a customer focused company is the establishing of a lasting business relationships with its Customers, based on mutual trust and satisfaction. For this reason, Daldoss can provide the original

spare parts for all **Microfreight** models. Moreover, all the **Microfreight** lifts are supplied with 12 months guarantee valid from the date of the shipping of the equipment.

Microfreight range, always equipped with structure supported frame, is the most flexible and reliable solution to move heavy goods between floors.
